## EMG portable device

### Technical data

Class	II BF
Power Supply	Internal lithium-ion single cell
Battery life	4h
Channels	32
Bandwidth	10 – 500 Hz
Sampling frequencies	250, 500, 1000, 2000 Hz
Resolution	16/24 bits
Input range	0 ÷ 3.3 V <sub>PP</sub>
Noise	< 2 μV <sub>RMS</sub>
Input impedance	> 1000 MΩ
Weight	110 g

### General description

Trentadue is a 32 channel portable device for EMG signals detection. It has WiFi capability and it can transfer data online to a PC, tablet or smartphone with a proper running application.

Our technology

Patented concentric electrode CoDe

### Technical specifications

Different adapters allow the connection of electrode matrixes, electrode arrays or bipolar electrodes.

Data detected by the device can be accessed online through a TCP socket. Custom application can be developed in order to acquire or process the signals online. Alternatively, the freeware software OT biolab can be used to display and acquire the signals collected from Trentadue.

# 32 channels
